***Information Disclosure Statement***

The Information Disclosure Statement under 37 C.F.R. 1.97 has been received and reviewed. However, the information disclosure is not deemed to be pertinent over the prior art of record.

***Drawings***

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: Item (30). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

2. Claims 1, 21 and 38, respectively, recite the limitation "...trimethylsilane..." in line 4, respectively. There is insufficient antecedent basis for this limitation in the claim. Please add the word —a— before the word "trimethylsilane" for proper antecedence.

***Allowable Subject Matter***

3. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
4. Claims 2-20, 22-37 and 39-49 have been objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 1, 21 and 38 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
6. The following is a statement of reasons for the indication of allowable subject matter: The most relevant prior art of record is U.S. Patent No. 6,511,539 (Raaijmakers, et al). However, it does not teach nor fairly suggest an atomic layer deposition method of forming a silicon dioxide comprising a layer on a substrate, comprising: positioning a substrate within a deposition chamber; flowing trimethylsilane to the chamber and flowing a first inert gas to the chamber under conditions effective to chemisorb a first species monolayer comprising silicon onto the substrate, the first inert gas flowing being at a first rate; after forming the first species monolayer, flowing an oxidant to the chamber and flowing a second inert gas to the chamber under conditions effective to react the oxidant with the chemisorbed first species and form a monolayer comprising silicon dioxide on the substrate; the second inert gas flowing being at a second rate which is less than the first rate; and successively repeating said a)

trimethylsilane and first inert gas flowing and b) oxidant and second inert gas flowing effective to form a silicon dioxide comprising a layer on the substrate.
